

Cyber secure back to work!

Are you ready to start work again safely?

Did you update your operating systems and your apps?

no

Update all your devices and apps. This way, weaknesses in an older version will be fixed and the system will be more safe.

yes

Do you have a secure network connection or 3G/4G?

no

Unsecure connections could lead to other people viewing your activities. Make sure that you're connected to a secure network or use 3G/4G.

yes

Are your passwords strong and recently updated?

no

The day after your holiday is the ideal moment to update your passwords. Use a password manager to store them safely.

yes

Are you aware of phishing mails?

no

An overloaded email inbox could include phishing mails. Check the sender carefully, don't open attachments and never share personal data via email.

yes

Excellent! You're ready to get back to work.
